

Cable Terminal Boot (SITB-01)

Silicone Terminal Protector Boot SITB-01 can be used in the Ring main units having Bushing of C type interface. Modern switchgear where compactness is often achieved through use of Insulating SF6 Gas. Cable Terminal Protector is extremely well suited for this kind of Switchgear. It can accommodate cross section up to 300 Sq.mm.

Terminal Boots applied for switchgear and transformer connections with the function of protecting, insulating, and sealing. They are also used to reduce the clearances between phase to phase and phase to ground. Such boots have outstanding behaviors from the weathering resistance and electrical properties.

FEATURES

- High performance insulation material
- Outstanding track resistance
- Environmental and erosion resistance
- Connection can be energized immediately after installation
- Unlimited shelf life

Cable Terminal Boot	kV Rating	Impulse Voltage
SITB-01	15 kV	95 kVp
